NordSec 2009 is held at the University of Oslo from 14 to 16 October 2009. In addition to the regular research paper track it hosts the Nordic Security Day, short paper sessions and a student poster exhibition.

NordSec brings together computer security researchers and practitioners from around the world, in particular from the Nordic countries and Northern Europe. The conference focuses on applied IT security and is intended to encourage interaction between academic and industrial research.

Contributions are solicited, in particular over the theme "Identity and Privacy in the Internet Age", as well as over other topics in IT security, including, but not limited to, the following areas:

- Applied Cryptography
- Commercial Security Practices
- Communication and Network Security
- Computer Crime and Info Warfare
- Hardware and Smart Card Applications
- Internet and Web Security
- Intrusion Detection
- Language-based Security Techniques
- New Ideas and Paradigms in Security
- Operating System Security
- PKI Systems and Key Escrow
- Privacy and Anonymity
- Security Education and Training
- Security Evaluations and Assurance
- Security Management and Audit
- Security Models
- Security Protocols
- Social-Engineering and Phishing
- Software Security
- Trust and Reputation Management

Papers should not exceed 16 pages in Springer LNCS format. The proceedings will be published in the LNCS Series.

### Nordic Security Day

Theme: *Identity and Privacy in the Internet Age*  
The Nordic Security Day on Wednesday 14 Oct. 2009 will gather experts and stakeholders from industry, academia and the public sector who will give their interdisciplinary views on this important theme. A reception will be given in the evening at the Telenor Headquarters in Oslo.

### Short paper sessions

Short papers are solicited for presentations of 5 to 10 minutes. Short papers will appear in locally printed proceedings, not in the LNCS proceedings.
